CMC Interactive Launches Outsourcing Service for 401(k) Providers
SunGard to Provide Technology to Support Offering

New York, NY – May 11, 2009 – CMC Interactive, a leading New York City-based retirement plan provider, has announced CMC Outsourcing for firms servicing 401(k) and other types of qualified retirement plans. The program offers customers a broad array of service options for recordkeeping, plan administration, and registered investment advisory services.

CMC Outsourcing customers may elect one or more service tiers covering daily recordkeeping, trading and reconciliation, payroll and contribution processing, compliance testing and reporting, plan sponsor and participant web interaction, call center support, and access to investment advice. The company will provide services through its U.S. offices.

CMC uses SunGard’s Relius Administration platform for recordkeeping, plan administration, and as the base architecture for its customized Web portal for plan sponsors and participants. SunGard’s industry-proven technology infrastructure will provide CMC with the high-volume processing support required for outsourcing services.

CMC’s co-founder and principal Michael Calandra said, “Customers of this service will be able to focus on building their consulting practices and enhancing customer relationships instead of concerning themselves with the operational details of recordkeeping and plan administration. We think it is a very progressive model.”

Kevin Rafferty, president of SunGard’s wealth management business, said, “Today’s economic climate is putting increased pressure on 401(k) providers to effectively service their clients while meeting the expectations of investors. SunGard’s Relius technology solution helps CMC offer cost-effective, customized services that meet the needs of their clients.”

About CMC
